

NO-TOX EDIMARK[®] (INK JET PRINTING SYSTEM)

*NT36EDI**(12/14)*

- Product Type:** Edible pigment based inks for jet printing.
- General Description:** Edimark inks are pigment based, specifically designed for jet printing onto tablets, capsules and other edible substrates for pharmaceutical, food, or confectionery applications. The ink series includes solvent and aqueous variations, has good color and gloss, as well as excellent water, scratch and smear resistance. All inks exhibit excellent adhesion and other properties as required for each substrate.
- Printing system:** Edimark inks can be formulated for piezoelectric printing, thermal inkjet printing, or continuous inkjet printing.
- Flush*:** Each Edimark ink is supplied with a compatible flush for printing system flushing and cleaning.
- Special Handling Procedures:**
- Viscosity:** Supplied at the appropriate viscosity for the printing method or as otherwise requested by the customer.
- Clean-up:** Use only the flush solvent for system cleaning.
- Color availability:** As requested by the customer or prospect and varies by application method, chosen substrate and regulatory requirements.
- FDA compliance:** Edimark formulas can be submitted to the FDA for inclusion in Colorcon No-Tox Products' Drug Master File #17155 and are manufactured under strict cGMP guidelines in our dedicated facility. All components are direct additives for either food or drug products, depending on the intended end-use.

*Note: Use No-Tox supplied flush solvent only for jetting application.
